Stocking the Display Box

Written By: iRobot

PARTS:

- [54 Piece Bit Driver Kit \(14\)](#)
- [25 Piece Bit Driver Kit \(10\)](#)

SUMMARY

This guide will show the proper way to assemble a display box and place the 54 and 26 piece bit driver kits inside.

Step 1 — Stocking the Display Box

- Place the 54 piece bit driver kits on the right side of the display box.
- Stack them, laying down, three high in the front.
- Behind the horizontal kits, stack them, vertically, four rows deep.

Step 2

- Stack another row of 54 bit driver kits with the same dimensions adjacent to the first row.

Step 3

- On the left side of the box, place the 26 bit driver kits.
- Lay the kits horizontally, two high and two deep.
- Place a single 26 bit driver kit on its end at the back of the row.
 - Be sure to place them with the logo upright.

Step 4

- Stack another row of 26 bit driver kits right next to the previous row.
